

Internet Safety Insights

ACCESS:

Phones, Laptops, iPads, and Video Game Consoles are all items predators use to reach your child

PROTECT:

Keep internet devices out of the bedroom. Keep games/computers in the living room. Charge them in parent's bedroom at night.

SOCIAL MEDIA:

Have your child show you ALL social media apps on their devices & how they work. Add those apps to your device and friend/follow your child

APPROPRIATE FOLLOWERS:

Ensure your child knows everyone on their friend/follow lists and that they never accept requests from strangers.

MONITOR:

Review your child's chat history to see who is talking to them. Be suspicious of predators, <u>not</u> your child.

EMPOWER:

Explain there are dishonest people who will manipulate them into dangerous situations and predators who will try to win their trust by pretending to love/care for them

Start the Conversation!

"It's your life. These are your friends. As you socialize online, I cannot always protect you. So, I want to help you learn how to be safe, to guard your personal privacy and security. You knowing this stuff can even help your friends stay safe."

CONNECT:

Ensure they know you are available to ask if something or someone is good or bad. Be direct & ask if: they have seen pornography online, anyone asked for or sent a nude photo, they would know what to do if that happened, anyone talked to them about sex, offered gifts, or told them to keep their friendship a secret.

ASSURE:

Ensure they know if any of the things in #7 have happened or are happening they can safely tell you and you will help them navigate it. Make sure they know you will still love them no matter what.

Grab an App designed to help kids in an emergency. They can:

- o set off a siren
- o make a fake call
- send notifications

Find them on Google Play or the App Store

- Circulo (English & Spanish)
- o BSafe

Utilize device monitoring solutions to help your child navigate the internet safely.

- WebWatcher webwatcher.com
- TeenSafe teensafe.net
- Bark bark.us
